D4I Data Use and Learning

International Maternal Newborn Health Conference (IMNHC) 2023

From May 8-11, D4I attended the [IMNHC conference](#) in Cape Town, South Africa. D4I stood alongside 1,500+ maternal and child health innovators to help accelerate solutions to some of the most pressing global health challenges. Key [D4I presentations](#) included a demonstration of the EN-MINI tools at the Technical Marketplace and a panel featuring the EN-MINI tools as well as clinical vignettes based on D4I's experiences in the Democratic Republic of the Congo and Nigeria.

D4I and partners demonstrated the EN-MINI tools at the IMNHC Technical Marketplace.

Data Review Rooms in Moldova

The government of Moldova has opened two Data Review Rooms through the support of USAID and D4I. The Rooms facilitate regular and timely review of data to support the Ukrainian refugee crisis, coordinate response, and prepare for

The Ministry of Labor and Social Protection's Data Review Room in Chişinău, Moldova.

future emergencies. The [first Room](#) was launched in Ştefan Vodă, a central entry point for many fleeing Ukraine, within the Directorate General for Social Assistance and Family Protection. The [second Room](#) was opened within the Ministry of Labor and Social Protection in Chişinău. The rooms represent the Moldovan government's commitment to using data for stakeholder-led decision making.

Behavioral Interventions for the Use of Evaluation Findings

Significant investments are put into health research, resulting in more data than ever being generated and analyzed. Yet, these findings are not always used to inform decisions about global health programs and policies. A new D4I report, [Behavioral Interventions for the Use of Evaluation Findings](#), applied a behavioral perspective to understand both barriers and enablers of evaluation findings in USAID global health programs. The report recommends 10 promising strategies for increasing the use of evaluation findings, which are summarized in an [infographic](#), [brief](#), and [webinar](#).

New Publications

Read the Latest D4I Blogs

Indicator standardization is crucial to data use and tracking key reproductive health indicators across intervention areas and countries. D4I researchers shed light on the need for a standardized measure of contraceptive method availability. [Read more here.](#)

As a part of D4I's [small grants program](#), Knowledge SUCCESS released the first of a four-part blog series. [Read about one research team member's](#) experiences working on a study during the fall of the Afghan government, and her and her team's insights about family planning use in Afghanistan.
